# REGAL DRAPES

Somfy Motorized Track

Assembly, Installation & Programming Instructions

Pleated, Goblet and Flat Panel Drapery
Ceiling or Wall Brackets

Let's get excited for your new drapes. Please take a few minutes to review these simple steps so your drapes will be hanging beautifully in no time.

Getting Started

Please read all instructions before you begin. If you should need help or have any questions, please call us at 800-256-5005.

Please note:

- Tracks longer than 96 inches are partially disassembled before shipping. Please follow the assembly instructions on how to prepare the track for installation.
- There is a single drapery pin attached to the return side of your drapes. This drapery pin should be connected to the tenter hook.
- Your drapery track was **not pre-programmed** before shipping. Please install your track and mount the drapes before connecting and powering up the motor. Follow the simple programming instructions to record open and close drape positions in the motor's memory.

If you need to adjust either open or close positions or add a preferred middle position – please refer to the programming instructions.

Recommended Installation Order
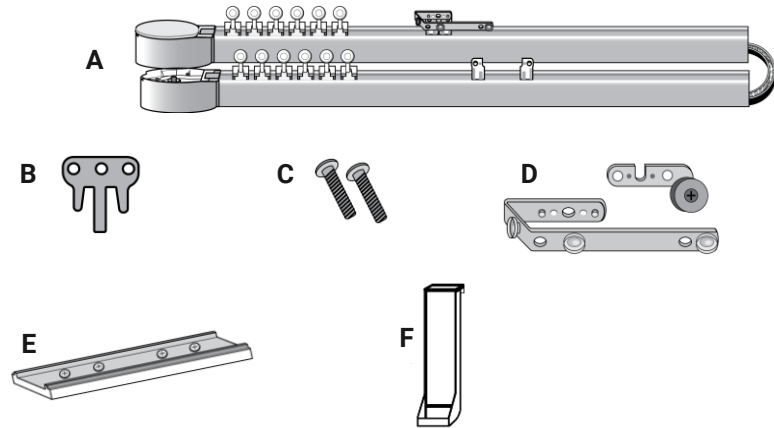

Re-Assembling Folded Drapery Track

Track & assembly parts included in your package:

Partly assembled Somfy™ Track (**A**)
Master Carrier Fixing Plate (**B**)
Carrier Arm Screws (**C**)
Overlap (**D**) Carrier Arm
Rail Splice (Attached to the Rail) (**E**)
Motor Hook (**F**)
Assembly and Installation Instructions

Tools required for assembly:

Flat Head Screwdriver
Phillips Head Screwdriver
Hammer or Mallet

## Re-assembling Folded Drapery Track Steps

Step 1

Carefully remove folded track (**A**) from the shipping box, unfold and place it on a flat surface. Remove the packaging material, and the securing tape.

Step 2

Slide the unassembled (separated) master carrier bodies together. This will close the gap between the separated track pieces.
Next insert the *Fixing Plate* (**B**) into the two master carrier bodies.
Step 3

Locate *Rail Splice* (**E**) which is installed on the top side of the track. Loosen the holding screws. Using a hammer and a flat head screwdriver, gently tap the *Rail Splice* (**E**) centering it between the two joined rails and secure by tightening screws.

Make sure there is no gap between the parts of the track.

Step 4

Attach *Carrier Arm* (**D**) (as pictured) to the joined master carrier bodies using the *Carrier Arm Screws* (**C**).

Overlap Carrier Arm – Back View

Overlap Carrier Arms – Front View, Center

Step 5

Attach the *Motor Hook* (**F**) to the pulley.

4

Installing Somfy Motorized Track

Parts Included in Your Package

Drapery track, partially assembled for tracks 96" or longer.
Mounting Clips (**A**) - for ceiling mount.
Mounting Clips (**A**) & Wall Brackets (**B**) – for wall mount.
Motor (**C**)
Battery (D) – for WireFree tracks.
Remote Controller (E)
Battery Charger
Screws & Anchors

Tools required for track installation:

Drill with Phillips screwdriver bit	Pencil
Phillips head screwdriver	Metal tape measure
Flat head screwdriver	Level (for wall mount)
Step ladder	

General Notes

Brackets should be installed 20"-25" apart, preferrable where the wall studs or the ceiling joist are located. Please use the included screws if installing directly to the wall stud or the ceiling joist.

If brackets are installed on the Sheetrock – please use the included anchors. You can use anchors of your choice if they are rated to hold at least 50-60 lbs. on the typical Sheetrock. Please DO NOT INSTALL brackets without the anchors if there is no stud or joist behind.

Track Installation – Wall Mount (Ceiling Mount Instructions on Page 6)

Step 1 - Wall Mount – Marking Brackets Positions

Marking Bracket's Height

Most of the time we recommend centering on window or door. Determine the height of the top of the brackets and mark bracket height on the wall for all the brackets. Adjust as necessary to make sure they are all level and in a straight line.

The recommended method to determine height is to add 1 ¾ inches to the length of your drapery panel.
For example: if drapery panels are 84 inches long, the top of the brackets would be installed at 85 ¾ inches allowing a ¼" clearance above the floor.

If needed, please use the following formula to calculate the height where to put the mark on the wall for brackets installation:

$$\underline{\hspace{3cm}} + \underline{\hspace{5cm}} + 1\tfrac{1}{2}" = \underline{\hspace{3cm}}$$

<table>
<tr>
<td align="center">Drape Length</td>
<td align="center">Clearance Between the Drape and the Floor</td>
<td align="center">Height of the Wall Marking
(Align the Top of the
Bracket with the Mark)</td>
</tr>
</table>

Marking Bracket's Horizontal Placement

The side brackets should be Installed at 4 - 5 inches in from the ends of the track. If your track has a splice, the center bracket should be at least 3.5 inches off the center cut because the splice will prevent to attach the mounting clip.

4-5 inches from the end of the track

Center on window

Step 2 – Assembling Wall Bracket

Use the Phillips head screwdriver to remove two front screws from the wall bracket (**B**) and use them to secure the mounting clip (**A**) to the wall bracket (**B**). Please see the final assembly in the picture below.

If needed, use the two back nuts to adjust the distance between the track and the wall.

Step 3 – Mount Brackets to the Wall

For wood frame header or wall stud locations, drive provided screws through the bracket mounting holes directly into wall.

When studs are not located where bracket is installed, use drill with the Phillips bit to drive provided anchor into Sheetrock and then screws into the anchors. The provided anchors must be used to install brackets for standard Sheetrock.

For other wall types, use appropriately rated anchors (not included).

6

Track Installation – Ceiling Mount

Step 1 – Ceiling Mount – Marking Bracket Positions

Most of the time we recommend centering on window or door. Measure the width of the track and mark the two end brackets approximately 4" - 5" in from the ends of the track, preferably on ceiling joists. Brackets should be a minimum of 3" from the wall. Evenly space the remaining brackets, preferably on ceiling joists, and place corresponding marks in a straight line.
If your track has a splice, the center bracket should be at least 3.5 inch off the center cut because the splice will prevent to attach the mounting clip.

Step 2 – Mounting Brackets

For wood frame joist, drive provided screws through the bracket mounting holes directly into joist. When joists are not located where bracket is installed, use a drill with the Phillips bit to drive provided anchor into Sheetrock and then screws into the anchors. The provided anchors must be used to install brackets for standard Sheetrock.

For other wall types, use appropriately rated anchors (not included).

Attaching Track to the Brackets

Attach track to the brackets by leaning track onto front clips (1).

Using your thumbs, push the bracket in and rotate up to pop track into back clips (2). Press on the front of the mounting clip if needed to slightly move the front clips inside.

You will hear a click when track is set in place.
Mounting the Drapes

Step 1 − Attaching Drapes to Master Carriers

Start mounting drapes from the lead (center) side of the drape outward.

Attach the first drapery hook on the leading edge to the first outer hole on the master carrier arm.
Connect the second drapery hook on the first pleat to the second hole on the master carrier arm as shown in the picture.

Continue attaching the rest of the hooks to the track carriers.

Step 2 − Attaching the Second-To-Last Drapery Hook

Install the drapery hook on the last pleat on the return side onto the motor hook (installed onto the motor pulley).
Step 3 − Connect Drapery Return to Wall

Affix the tenter hook to the wall and attach the pre-installed drapery hook to the tenter hook to create a return. This will return the drape to the wall, concealing any side-light view. Drapery pin can be adjusted to desired return height.

The Finished View of Correctly Mounted Drapes.

The final back and bottom-up view of the drape and track assembly should look like the illustration below.

8

Connecting and Programming the Motor

When the motor connected to the power source for the first time - it enters a programming mode. It is more convenient to program the motor right away without a delay. You can reprogram the motor or adjust the drape open and close positions at any time thereafter.

🛑 Have your Remote Controller on hand to start the programming right away!

🛑 Manually move drapery to a middle position along the track. This allows for movement of the drape in either direction.

Step 1 - Attaching the Motor – All Motors

Unlock motor by moving plastic tab at the top of motor (1). Attach motor to track with the small twist (2) and lock tab into place (3).

Step 2– Connecting Power to the Motor

Battery Powered Irismo Motors.

Attach the battery to the bottom of the motor.

🛑 Disconnect the power cord from the battery before programming.
Plug-in Glydea Motors.

Plug in the motor's power cord to the wall outlet.

# Programming the Open & Close Positions

Step 3 - Initiate Programming

Press & Hold the **OPEN/UP** and **CLOSE/DOWN** buttons simultaneously until the drapery jogs.
Step 4 – Setting Limits

Briefly press **OPEN/UP** or **CLOSE/DOWN,** the drapery automatically runs to record both hard stop positions.
Step 5 - Check the Direction of Operation

Briefly press **OPEN/UP** button**.**

If the drapery opens, the direction of rotation is correct, go to **STEP 6**

If the drapery closes, the direction of rotation is incorrect, press the **MY** button until the drapery jogs: the direction of rotation has been modified.

STOP
To confirm press the **OPEN/UP** button and check the direction of rotation again.

Step 6 - Recording the Remote Controller

Using a small pin, press & hold the Prog button on the back of the Remote Controller until the drapery jogs. The Remote Controller is now recorded. To operate the drapery, press the **OPEN/UP** or **CLOSE/DOWN** button.

The drapery is now in user mode.

10

Use and Maintenance

Use the next instructions to adjust the motor settings after the initial programming sequence is complete.

Resetting the End Limits

Readjusting the Open End Limit.

1. Press the **Open** button to open the drapes.
2. Simultaneously press and hold the **Open** and **Close** buttons until the drapes move.
3. Use the **Open** or **Close** buttons to move the drape to a new Open End limit position.
4. Press and hold the **My** button until the drapes move. The new Open position is set.

Readjusting the Close End Limit.

1. Press the **Close** button to close the drapes.
2. Simultaneously press and hold the **Open** and **Close** buttons until the drapes move.
3. Use the **Open** or **Close** buttons to move the drape to a new Close End limit position.
4. Press and hold the **My** button until the drapes move. The new Close position is set.

Setting Silent or Hi-SPEED Mode - *Glydea plug-in motors only*

Switching between the Silent or Hi-SPEED modes.

Slide the switch on the motor's end to either the Silent or Hi-SPEED setting. Follow the instructions below on how to adjust the speed in Hi-SPEED mode.

Drapery Care

Pardon my wrinkles, I've been through a long trip. Most of my wrinkles can be shaken out and will release after I've been hanging for a week or two.

- Once the draperies are installed and dressed, most wrinkles and folds will hang out on their own within 1 - 2 weeks.
- A garment steamer may also be used to help smooth out the wrinkles. Please take care not to overheat the fabric while removing wrinkles. You also can use a wrinkle release spray like Downy© Wrinkle Releaser.
- Certain fabrics like silks or linens have natural characteristics that steaming will not remove.

Please contact Customer Care at 1-800-256-5005 if you have additional questions about how to care for your drapes.

Questions? Comments?

Our dedicated Customer Care Team is available to answer any questions you may have about your drapery or installation. Contact Us at 1-800-256-5005 ext. 104 or email customercare@regaldrapes.com. 800-256-5005 | RegalDrapes.com

Thank you for choosing Regal Drapes. We are proud to make your drapes with careful attention to every detail. We hope you enjoy your drapes for many years to come.
