REGAL DRAPES

Instruction For Universal Tension Safety Device

⚠ **WARNING**: It is imperative that the Tension Safety Device for bead chain/cord loop be properly secured to the wall or window frame to reduce a child's access to the bead chain/cord loop. Young children can wrap bead chain/cord loops around their necks and strangle. Always keep loops secured and out of the reach of children.
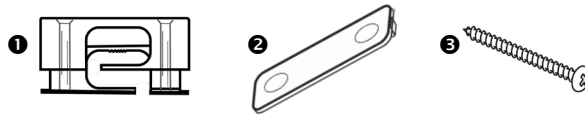

Parts Included

One assembled Tension Safety Device (1)

Cover for Tension Safety Device (2)
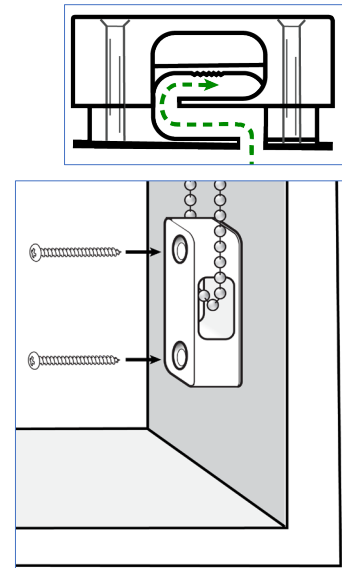

Two 1 ½" #6 wood screws (3)

❶   ❷   ❸

Installation

Attach the tension device to the bead chain/cord by pressing the tension device springs halfway and sliding the chain/cord through the open channel.

Pull down the tension device with the chain/cord along the window frame in such a way that the chain/cord loop can move freely through the device.

Mark locations for screws on the window frame, pre-drill holes if needed and use a screwdriver to attach the tension device to the window frame. Use included #6 screws. Cover the screw with the tension device cover.

Ensure that the chain/cord is straight, tangle-free, and not too taut.

If you require additional parts or help with installation, call our Customer Care Team at 800-256-5005 or email us at customercare@regaldrapes.com.
